 [Luding Castañeda](#)

Skills

Backend technologies

 Python (Flask)

 Ruby (Rails)

 JavaScript (Express)

 Go (Fiber)

Frontend technologies

 Html, Css and JS

 JavaScript (VueJS, ReactJS)

Other technologies

 Docker (CI/CD)

 Git (Github)

Soft Skills

 Leadership

 Communication

 Planning

 Agile methodologies (Scrum)

Profile

I'm a passionate Software Developer with experience working in the Web World, I really love work with new technologies and create creative solutions for problems using software as a tool. Usually I learn about innovation by testing Machine learning models or making mechanics in video games engines (commonly Godot), is part of my adventure spirit.

Professional Experience

Artificial Intelligence QA Developer
Revelo (April 2024 - Present)

I'm working in the training of different LMMs focused in code generation with a variety of programming languages. As a QA developer, my main resposability is build a fine tuning over the models to adjust the generated code and explanation based in good practices and standards.

Full-Stack Developer
Fusepong (Sep 2021 - April 2024)

I was making a powerful access control software with a great team as full-stack developer using PostgreSQL and Rails in the backend and, VueJS with Cordova in frontend. Additionally, we use Docker with different frameworks, usually from Python for create operative systems in micro-controllers and microservices connected with CI/CD in Kubernetes with Github Actions. All focused on create an integrated ecosystem of innovation in the Latam security.

Web Developer
Freelance (Jul 2019 - Sep 2021)

Worked on a lot of independent or personal projects with MERN stack (MoogoDB, Express, ReactJS, Node), using in some cases Handlebars like template motor (for fast projects without a big frontend requirement).

Education

Electronic Engineering
UNAD (Universidad Nacional Abierta y a Distancia)
2021 - Present

I'm studying Electronic Engineering, I've learned C, C++ and VHDL focused in the implementation of micro-controllers and micro-processors, also I'm learning the process to design intermediate level integrated circuits for build simple electronic machines by myself.

Technical Degree in Software Development
SENA (Servicio Nacional de Aprendizaje)
2019 - 2021

Basis of software development from logic to advance algorism and OOP are concepts that I learned in this institute, coding in Java and PHP and building personal web apps.
