Skills

Backend technologies

🐍 Python (Flask)

💎 Ruby (Rails)

JS JavaScript (Express)

🐹 Go (Fiber)

Frontend technologies

Html, Css and JS

JS JavaScript (VueJS, ReactJS)

Other technologies

🐳 Docker (CI/CD)

Git (Github)

Soft Skills

👤 Leadership

Communication

Planning

Agile methodologies (Scrum)

Profile

I am a passionate Software Developer with experience working in the Web World, I really love work with new technologies and create creative solutions for problems using software as a tool. Usually I learn about innovation by testing Machine learning models or making mechanics in video games engines (commonly Godot), is part of my aventure spirit.

Professional Experience

Full-Stack Developer

Fusepong (Sep 2021 - Present)

I am working as Full-Stack using PostgreSQL and Rails in backend development, VueJS and Cordova in frontend development and docker with python for creating OS in micro-controllers and microservices connected with CI/CD Kubernetes. All focused in create an integrated ecosystem of innovation in Latam access control and security.

Web Developer

Freelance (Jul 2019-Sep 2021)

I worked in a lot of independent or personal projects using de MERN stack (MoogoDB,Express,ReactJS,Node), using in some cases Handlebars like template motor (for fast projects without a big frontend requirement)

Education

Electronic Engineering

UNAD (Universidad Nacional Abierta y a distancia)
2021 - Present

I am studying Electronic Engineering, I was learn C, C++ and VHDL focused in the implementation of micro-controllers and micro-processors, too I learned the process to design intermediate level integrated circuits for build simple electronic machines by myself

Technical Degree in Software Development

SENA (Servicio Nacional deAprendizaje)
2019 - 2021

I studied software development, from logic think to advance algorism and POO, coding in Java and PHP
